---

## Summary

---

A skilled Data Analyst and Software Engineer proficient in Python, C/C++, and JavaScript. Experienced in leveraging data analysis tools & libraries such as Pandas, NumPy, and Matplotlib to deliver efficient solutions. Possesses strong technical and soft skills, including team leadership, consistently driving successful project outcomes.

## Experience

---

### Freelance/Self Employed

#### Project Manager & Software Engineer | 12/2022 - Present

- Developed and initiated projects, managed costs, and monitored performance.
- Monitored project progress, identified risks, and took corrective action as needed.
- Achieved project goals ahead of deadlines.
- Analyzed project performance data to identify areas of improvement.

### Freelance/Self Employed

#### Python Developer | 01/2022 - 11/2022

- Worked independently to design, develop, and test code.
- Prioritized tasks and completed them in order of importance.
- Worked with developers to identify and remove software bugs.
- Identified possible system enhancements to improve functionality.

### Freelance/Self Employed

#### Quality Controller | 01/2021 - 02/2022

- Recorded defects and coordinated issue resolution with the development team and functional leads.
- Tested web products and maintained detailed records.
- Identified defects during cyclical checks.

## Skills

---

Programming (Python, PHP, js, Android, c/c++), Frameworks (React, Django, Node.js, flask), Databases (MySQL, SQLite, MongoDB), Libraries (Pandas, Numpy, Matplotlib, Plotly, Scikit-learn), Tools (Watson studio, IBM Cognos, Postman), Quality Assurance & Control, Critical Decision Making, Team Leader

## Education

---

### New York University

Micro-bachelors in Computer Science | 04/2022

### Gujarat Technological University

Diploma in Computer Engineering | 07/2021

## Certificates

---

Professional Data Analyst (IBM Skills Network), Python Specialization (University of Michigan), The Fundamentals of Digital Marketing (Google)
