

# MALAZ IBRAHIM

## ABOUT ME

Accomplished and highly-organized Data Analyst with a BSc. in Statistics and computer Science, and over 6 years of professional experience involve the process of identifying, correcting, and removing inaccuracies, inconsistencies, and errors in order to analyze different type of data. I can adapt to any environment easily, and I was very obliging in adding new work techniques and writing strategic plans in the institutions of which I was a part, which led to reducing time and increasing production. Eager to join a work environment that can use my skills and experience in a way to plan for better production.
